**Due dispositivi in uno:
montacarichi e piattaforma
di trasporto**

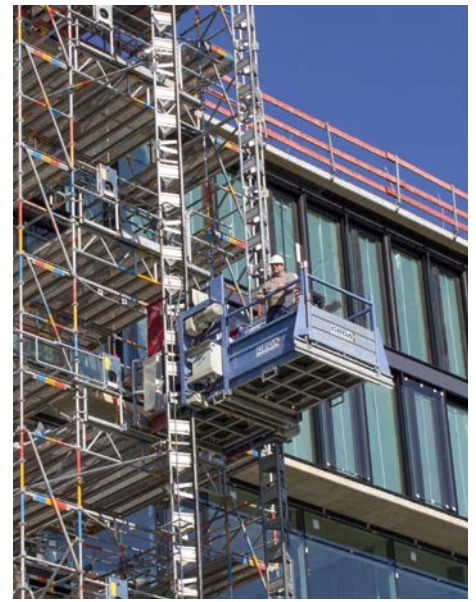

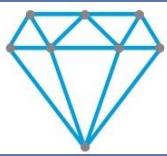

**Flessibile – il giusto tipo di
piattaforma per qualsiasi
situazione in cantiere**

**Sistema colonne
GEDA UNI-X**

**Piattaforma idonea a
trasportare materiali
ingombranti e pesanti**

**Sistema di lubrificazione
automatica come standard**

GEDA 1500 Z/ZP

Il GEDA 1500 Z/ZP dispone di due sistemi di controllo separati e può essere utilizzato sia come montacarichi che come piattaforma di trasporto per persone e materiali a velocità ridotta di 12 m/min come da normativa vigente. Solo per il trasporto di materiali da costruzione, il dispositivo passa alla modalità di sollevamento del materiale con una velocità di 24 m/min.

Un montacarichi, numerose possibilità: la piattaforma di trasporto a doppia colonna GEDA 1500 Z/ZP si adatta idealmente a qualsiasi caratteristica del cantiere grazie al comodo sistema modulare con 14 diverse versioni di piattaforma e differenti capacità di carico. Le numerose varianti della piattaforma di carico del GEDA 1500 Z/ZP offrono molto spazio, idonee per il trasporto di materiali particolarmente pesanti e ingombranti.

Nonostante le elevate capacità di carico fino a 2000 kg, il collaudato sistema a doppia colonna UNI-X garantisce un movimento di marcia stabile e regolare.

Specifiche tecniche:

**2000 kg
7 persone**

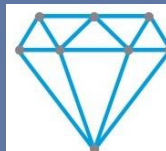

100 m

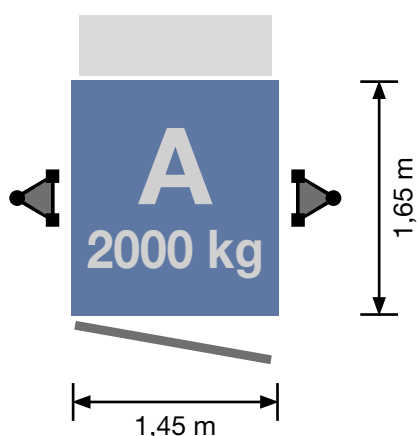

12/24 m/min

**2 x 3,0/6,1 kW/
400 V/50 Hz/32 A**

Piattaforma:

GEDA 1500 Z/ZP piattaforma A 1 porta di carico / 1 rampa di scarico

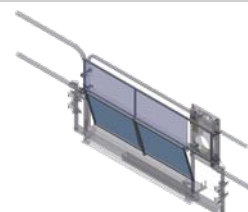

Cancello di sicurezza per sbarco al piano:

Kit telone di copertura disponibile!
